

Student accident insurance 2012-2013

Student Accident insurance can help families cover costs not otherwise covered due to lack of other insurance for their children or major medical plans with high deductibles and co-insurance requirements. Many school districts only cover liability incidents which means, if your child is injured due to an accident, the district is not responsible for those medical costs.

The Markel Student Accident insurance program helps families cope with these issues in a very cost effective manner. There are 3 different plans to choose from; School time coverage (accident only), Around the clock coverage (accident only), or Interscholastic football coverage.
